

SmartPlug

Enter the smart home market with the SmartPlug

Add greater upsell opportunities to your product offering and deliver value-added integration with the SmartPlug.

Make your users lives easier by automating, activating and switching devices on and off via the AndroidTablet with HomeControlHUB app. You can even create scenes to deliver the exact functions your customers want. Embrace the potential.

Plug in to the potential

SmartPlug

With the flick of a screen

With the SmartPlug, users can quickly and easily switch devices on and off. A simple flick of the AndroidTablet with HomeControlHUB's screen and the user can turn devices on and off around their property.

Be ahead with a schedule

You can pre-program the SmartPlug to turn on and off at specific times and days. This could turn lamps on and off around the property as a security measure, or to greet the user as they return home from work. Set the schedule.

Automate life easier

Alongside scheduling, you can set up automations to trigger based on the time of day. Requiring no interaction from the user, when the specified event takes place, the SmartPlug will trigger automatically to switch on or off any device it's connected to.

Create a scene

Program a scene to initiate a series of tasks when triggered by the user, for example, switching the living room lamp on and the hallway lamp off simultaneously. Once initiated, it will progress until it has completed the full sequence. Make home the perfect scene.

Smart control from anywhere

Once added to the system, users can take full advantage of the SmartPlug functions from anywhere using the AndroidTablet with HomeControlHUB. As long as they're connected to the internet, they're in control of the SmartPlug.

A smart SmartPlug

If the user unplugs the SmartPlug to move it elsewhere, or if there's a power cut, it doesn't need re-adding to the system. As soon as the SmartPlug is powered back up it will remember the Wi-Fi credentials and reconnect. Not only that, but there's no limit to how many smart devices can be added to one account. Now that's smart.

Simple learning process

The SmartPlug features an optimised setup to enhance your installation time, so there's no need to worry about fitting it. Get up and running to deliver the smart home functions your users desire, in no time at all.

Partcode	SMARTPLUG
SmartPlug	
Key features	
HomeControlHUB compatible	✓
Casing material	PC+ABS, fire-proof level V0
Indicator LED	Blue
Electrical specifications	
Input voltage	100 - 240VAC
Input frequency	50/60Hz
Maximum load	13A, 2990W general use
Wireless specifications	
Wi-Fi standards	802.11 b/g/n
Wi-Fi frequency	2.4GHz
Temperature	
Operating	-20°C to 50°C
Storage	-40°C to 80°C
Dimensions (W x H x D) and weight	
Dimensions	58 x 58 x 39mm (excluding pins)
Weight	85g
Certifications	
Electrical conformity	CE
Other	ROHS
